DESCRIPTION

armBUS Hardware/Software Control & Acquisition Systems

A revolutionary integrated hardware/software ecosystem, enabling the connection of teaching and research equipment to the modern world.

The armBUS standardised interface makes operating Armfield products easy for teaching and research, producing reliable data or product across multiple area's of industry.

armBUS a radical system for integrating electronic measurement sensors and control devices onto teaching and research equipment.

armBUS is a universal, single-wire interface which enables all peripheral sensors and control mechanisms to be connected to a digital bus with common ports. Connectivity is completely port independent, eliminating errors in the configuration of the system as well as enabling seamless integration of new sensors at any point in time.

armBUS can be interfaced to a variety of devices via a USB port, network port or wireless connection enabling the equipment to be operated with a PC, PC with touchscreen, optional LCD touchscreen or a mobile device such as a tablet.

Advantages of the armBUS system include improved reliability, improved interchangeability and improved accuracy. All sensors are pre-calibrated, eliminating the need for further calibration after installation or if a sensor is replaced.

TECHNICAL SPECIFICATIONS

FEATURES & BENEFITS

- Standard controls for all basic functions such as start-up & shut down
- Data logging as standard, results can be analysed in armBUS or exported to Excel
- Multiple languages are available (Language options are product dependent)

armBUS Hardware Acquisition and Control - TH6

TH6 FILM AND DROPWISE CONDENSATION DEMONSTRATION UNIT

- Total control and monitoring of process parameters
- Can view trends in current parameters
- Comparison of current data to previous process runs possible in real time
- Quick save feature for data recovery

armBUS TH6 – Hardware Acquisition and Control

armBUS Hardware Acquisition and Control - FT74XA

FT74XA MINIATURE-SCALE HTST/UHT PROCESSING SYSTEM

- Total control and monitoring of process parameters
- Can view trends in current parameters
- Comparison of current data to previous process runs possible in real time
- Quick save feature for data recovery

armBUS FT74XA – Hardware Acquisition and Control

armBUS Hardware Acquisition and Control - UOP30

UOP30 3-PHASE HORIZONTAL SEPARATOR

- 3-Phase horizontal separator
- Visual demonstration of the entire separation process
- Software Control, PID and data logging via PC

Armfield Limited. Unit 10 Headlands Business Park, Salisbury Road, Ringwood, Hampshire BH24 3PB.
England. Tel: +44(0) 1425 478781
