DESCRIPTION

A mounting tripod constructed from aluminium alloy is supported on three stainless steel rods secured by thumbscrews.

The rods are adjustable allowing the stand to be made level.

The **H1-11** stand is suitable for use with vernier type Hook & Point gauges (H1-1, H1-2, H1-3) and the Pitot Tubes (H30). It is essential for the convenient use of the gauges in physical models. Mounts and a clamp plate are included to make it suitable for other instruments, i.e. the Digital Hook and Point gauges (H1-7, H1-8), the micropropeller used on H32 and Propeller Velocity Flowmeter (H33). A carrier plate mounted on the tripod supports the gauge. The whole assembly may be adjusted for height on the support rods.

Levelling is assisted by use of a 'Bullseye' spirit level mounted on the top plate.

TECHNICAL SPECIFICATIONS

Product:

- H1-11

Ranges: 500mm (normal)

Diameter of base: 340mm

Overall height: 660mm (without gauge)
