H12-5

H12-1/H12-7 – Liquid Manometers & Meters

A range of general purpose laboratory manometers using liquid displacement to measure differential pressure.

PRODUCT CODE: H12

Categories: Educational, H Series - Hydraulic Instruments, H12 - Liquid Manometers & Meters

Tags: Fee-Standing Column , H Series , Height Adjustment , Hydraulic Measurement Instruments , Liquid Manometers & Meters , Self-Bleeding Pressure Tapping System , Self-Sealing

DESCRIPTION

A range of general purpose laboratory manometers using liquid displacement to measure differential pressure.

A range of manometers measuring differential water pressures up to approximately 12.6m H₂O. Scales are graduated in 1mm divisions.

H12-1: 1 metre scale differential open water manometer

H12-2: 1 metre scale differential pressurised water manometer (the air space above the tubes can be pressurised with the pump supplied)

H12-5: 500mm scale differential kerosene over water manometer – Range 0.213m H₂O

TECHNICAL SPECIFICATIONS

FEATURES & BENEFITS

Demonstration Capabilities

- Low cost and easy to use instruments
- Wide range of pressures accommodated using different manometer fluids

Accessories

H12-6: Fee-standing column with height adjustment to take two manometers.

Ordering Specifications

See description.

NOTE: Due to its hazardous nature and severe shipping restrictions, Mercury is not included in Armfield's scope of supply.

Shipping Specifications

PACKED AND CRATED SHIPPING SPECIFICATIONS

H12-1 / H12-6

Volume: 0.01m³

Gross Weight: 21.5Kg

Dimensions

See description

Order Codes

- H12-1
- H12-2
- H12-5
